Reference: Pregnant Solution Pond

Dear Mr. Ostler:

This letter is written to confirm my phone conversation with Mr. Lyle Stott on April 16, 1991, concerning the pregnant solution pond. After internal discussions, we have agreed to proceed and upgrade this pond in a similar fashion to the upgrade on the barrens pond. We feel it is in our best interest to modify the pond and we also feel the timing is appropriate to conduct the work.

I would ask that you refer to the construction details as developed for the barrens pond should any technical questions arise. We will provide your staff adequate notice to inspect the lower FML once it is cleaned. Tentatively we would initiate cleaning the week of April 22-26, 1991.

As I have mentioned previously, we will also upgrade the process water pond but it is our desire to conduct this work in conjunction with the pond expansion. Please advise us as to your position to allow us to begin this work on the process pond.

Sincerely,

TENNECO MINERALS COMPANY
